From our very first trek in the mountains of Nepal to pioneering remote routes across all seven continents, our journeys are built for those who want to truly explore – not just visit.

At the heart of what we do is a simple philosophy: take the paths less travelled.

This means travelling with care, supporting local communities, minimising our impact, and unlocking experiences that most travellers will never have.

If you're ready to go further and dig deeper, we invite you to join us on the Ho Chi Minh City to Hue e-Bike Cycle, a journey that captures the essence of a unique adventure.

Remote areas are sometimes unpredictable and itineraries may be altered. To get the most out of your adventure it is important that you are flexible, positive and eager to take on all the challenges that arise. If you are uncertain about your suitability for this trip we recommend that you speak with your consultant or travel agent.

cycling

We believe that cycling is one of the best ways to see a country. Our cycling trips have been well researched to take you on the best route which usually means a combination of tarmac and dirt roads, the odd main road but generally smaller secondary roads. And sometimes even the occasional hill! All of this so that you can see the incredible scenery and landscapes, view the main sights and along the way eat delicious food, stay at unique accommodation and discover the incredible people.

Generally we supply you with geared (21-27) mountain or touring bikes and support vehicle which will follow the group on almost all sections of the ride. All equipment and luggage will be carried by the support vehicle. You will need to carry a small day pack with your camera, sunscreen and water. It is important to remember that these cycling journeys are not designed to be a marathon event. No one needs to feel under pressure to ride. If at any point you do not wish to ride the vehicle is always available for you and your bike to be transported. Usually we stop every 10 to 20kms for a rest. This will be the time to recover your breath and replenish your fluids and energy with water and snacks.

Remember that cycling involves some physical exertion, so you cannot expect that you will not feel tired. A little bit of preparation will go a long way. Cycling, of course, is an active pursuit and to maximise your own personal protection in case of a tumble or fall, the wearing of a bicycle helmet is compulsory at all times whilst cycling.

country information

Vietnam is a country of remarkable cultural richness and natural beauty, stretching over 1,600km (1025 mi) kilometres from the cool mountains of the north to the tropical waterways of the Mekong Delta. Its landscapes are wonderfully diverse, ranging from terraced rice fields and forested highlands to limestone karsts, sandy beaches and bustling river systems. Cities such as Hanoi and Ho Chi Minh City offer a lively mix of French colonial heritage, modern energy and traditional Vietnamese charm. Vietnamese culture is shaped by a long history of regional influences, including Chinese, Cham and French traditions, blended with a strong national identity. Buddhism, Confucian values and ancestor worship all play a role in daily life, reflected in temples, family rituals and the country's strong sense of community. Food is a highlight of any visit, fresh, fragrant and regionally distinct, with northern, central and southern kitchens each offering their own memorable flavours. Travel in Vietnam is increasingly smooth thanks to good infrastructure, reliable domestic flights and well-connected transport networks. While major cities are vibrant

and fast-paced, much of the countryside remains relaxed and deeply traditional. With its friendly people, rich cultural heritage and striking variety of landscapes, Vietnam offers a rewarding and engaging travel experience for visitors.

climate

Vietnam's climate can vary markedly from region to region due to its extreme latitudinal span. You can go from soaring temperatures and extreme humidity in Ho Chi Minh City to cool and mild conditions in Dalat to frosts and even occasional snow in the mountains of the north. Generally two distinct seasons prevail in Vietnam: from November to April, the temperatures are usually fairly cool, especially in the north of the country. In the mountain areas temperatures can be as low as 0°C (32°F) and there can be a constant light drizzle. Hotter temperatures and heavy monsoon rains characterise the months from May to October, although you can experience rain at any time. The hottest months of the year are June, July and August. Southern Vietnam's weather patterns are more constant with a rainy season from May to October and a relative dry season from November to February. The temperatures in the south can rise as high as 35°C (95°F) from March to May.

There may be times when those with special requirements may need to provide their own food. We are unable to guarantee a peanut-free or allergen-free trip, and therefore, we strongly encourage that travellers with life-threatening or severe allergies take all necessary medical precautions to prepare for the possibility of exposure.
